The officials here were encouraged today by General Otla asotation of the original of credible persons, Filtpinos, it is understood, to the effect that Aguinaldo no langer has the power to keep the insurgenus under his lead, as this points to an early submission of the insurgents to the American government. None will be allowed to come into Manila, however, until they have laid down their arms for good. As for Agultaldo, it is now believed that

The Filipino troops, whose loss was comparatively small, tenaciously held their positions. The conduct of the Americans in the suburbs was outrageous. They compelled the inhabitants to leave their houses, and then shot them down the inhabitants to leave their houses, and then shot them down, regardless of sex. There is a reign of terror at Manila. Civilians are shot in the streets, without being challenged. The Hollo commissioners arrived at Manila at the invitation of the Americans and when they were starting to return the American soldiers were losting and pillaging. Againaldo sent commissioners to inquire of General Otis the reason for hostilities, offering summary punishment if the Filiphnos were found to be at fault. He received no satisfaction. The Americans are apparently determined on a war of extermination similar to their doings in the Carolines in November, violating the rights of mankind and of civilized warfare and committing a monstrout soutrage on civilization.
